

# Progress Paper Tubes

*Eco-Friendly Paper and Plastic Tubes*

## *Centrally Located In Midwest*

Located in Richmond, IN, Progress Paper Tubes (PPT) was founded from a rich history in the packaging and paper converting industry. With easy access to major interstates including I-70 and I-75 we are centrally located for easy shipping. Easily accessible major cities surrounding the area include Indianapolis and Fort Wayne in Indiana; Dayton, Cincinnati, Toledo and Columbus in Ohio; Chicago, Illinois; Lexington and Louisville, Kentucky.

## *Serving Wide Ranging Industries*

Our strong and durable cores and tubes have a wide range of uses. They are commonly used in industries requiring product to be wound. Main industries served include Wire & Cable, Textiles, Extrusions, Film, Rope & Cordage, Connectors, Stampings, and many other products that requiring wound storage for in-process needs, shipping, and/or stocking, and payed out later. Other uses include protective sleeve, cremation rollers, construction and blasting tubes.

## ***Creating A Sustainable Future***

We are committed to providing high quality sustainably sourced products. Our paper cores are made from 100% recycled paper and use environmentally friendly PVA glue with no harsh chemicals. They are both compostable and recyclable after end of use. And to close the loop, we recycle all of our production waste so that nothing goes into the landfill.

*PPT encourages recycling and upcycling products at end of use. Re-envisioning our, or any other products in new imaginative ways is not only fun and amazing but it also keeps post-consumer waste out of our landfills. Our contributions matter!*

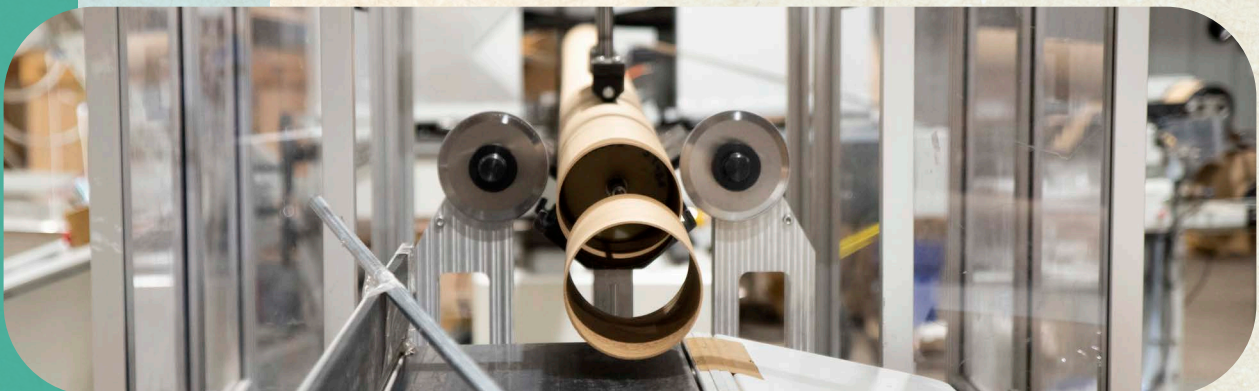

## *Dedicated Team*

The team at PPT are proud to serve our customers. Experience our expertise starting with your Quoting and Planning stage, on through to Ordering and Customer Service. We'll get you what you need, when you need it. Our staff can also provide technical assistance and ensure our products will work for your application.

## *State of the Art Equipment*

Our manufacturing facility utilizes top of the line core winders as well as auxillary equipment to ensure you are getting the best and most precise products. From selecting quality materials to superior craftsmanship, our team ensures that your product is made to withstand the vigors of your applications. We also offer precision in-line cutting.

## Customizable Packaging

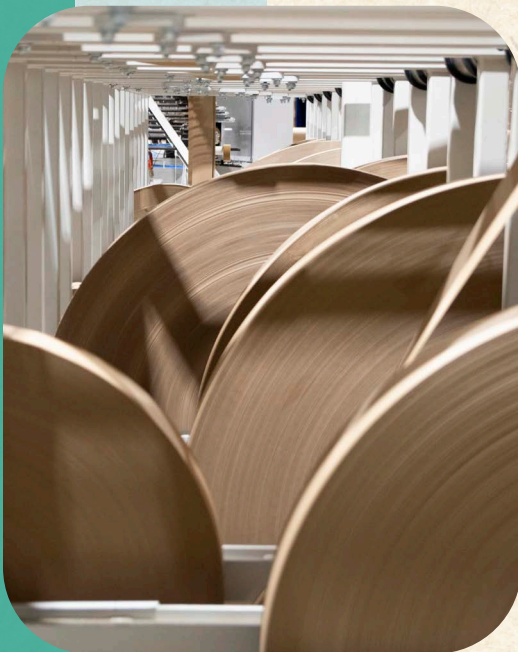

PPT offers many packaging solutions. Options include boxed, bundled, palletized, corrugated trays, and corrugated pallets. Our customers are in control of packaging based on their requirements but our staff is ready to assist in finding the best option for you. Other custom packaging options are available on request.

## Spiral Wound Paper Tubes

Our spiral wound paper cores and tubes are made through a blend of hard work, automation and attention to detail. We offer a large selection of core diameters to fit your needs. Within these sizes we have our commonly stocked wall thicknesses and cut lengths. We also quote off-standard wall thicknesses as well as customer specified cut lengths.

## Stocked Paper Cores

ID	STD WALL	MAX WALL	LENGTH
